

EVA SONNEVELD

HELLO, I AM EVA SONNEVELD

Graduated in Fashion & Design with a smart air pollution face mask collection. After my graduation I got the chance to do another internship at Philips design, focussed on trendsresearch and CMFG. Taking this chance gave me more insight in how to do trend- and material research on a more professional level. Currently, I am diving into the fashion design program Clo3D, to develop my skillset more towards the future of fashion design. I am passionate about research, colors, material innovation, design, sustainability and multidisciplinary collaborations. I love to develop myself and I am eager to learn.

EDUCATION & INTERNSHIPS

2019	Philips Design, Amsterdam Trend Analysis / CMFG, fulltime internship Primary focus on trend research for multiple design departments inside Philips, material innovation research as well as being involved in organising and visualising multiple events internally.
